Budhanilkantha, Kathmandu, Nepal

OBJECTIVES

Aspiring Python developer with hands-on experience in Python, Django, and web development. Eager to contribute to impactful software projects while enhancing technical expertise.

SKILLS

- Languages: Python, JavaScript, HTML, CSS
- Frameworks: Django, React
- Databases: MySQL
- Tools: Git, GitHub, VS Code
- Additional Skills: REST APIs, Web Scraping

PROJECTS

1. Learning Management System (LMS) — Django, MySQL — [GitHub](#)

- Built a role-based web app for students and teachers with authentication, CRUD for courses/assignments, course ratings, and personalized course recommendations.
- Improved organization of coursework and submissions while enhancing user engagement through ratings and recommendations.

2. BBC News Headlines Scraper — Python, BeautifulSoup — [GitHub](#)

- Fetched top 10 unique headlines from BBC News and saved them to a file, ensuring no duplicates.

3. Contact Book — Python — [GitHub](#)

- Developed a console app to add, search, update, and delete contacts with simple file persistence.

EDUCATION

- Bachelor in Computer Application(BCA) – Tribhuvan University Expected 2026
